

HOMIX[®]

HIGH-SHEARING-TYPE EMULSIFICATION AGITATOR

- Stator-rotor agitator
- The precision stator-rotor clearance is designed according to the user's process.
- Ultra-high speed operation generates strong shear forces and grinding and refining effects.
- *Upgradable magnetic drive version.*

Finely and evenly disperses materials.

Liquid-liquid emulsification and homogenization, and liquid-solid dispersion with particle size reduction.

Promotes emulsification of oil and water phases to form a uniform emulsion.

Applications: Agro-food , Biopharma,
Fine chemicals.
