

RIG™

PHARMACEUTICAL GRADE TOP-ENTRY AGITATOR

- Used in ultra-clean operating conditions.
- Instant sterilization – The agitator is designed to allow cleaning and sterilization inside the vessel without disassembly.

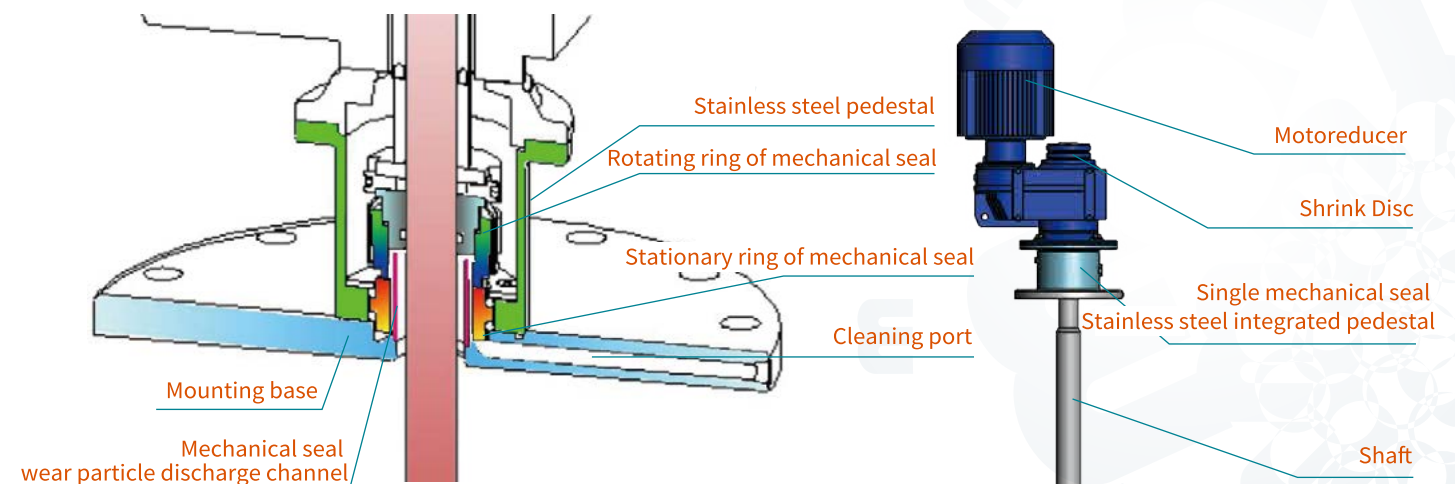

PHARMACEUTICAL GRADE

MECHANICAL SEAL DEBRIS COLLECTION

HIGH TEMPERATURE DISINFECTION & STERILIZATION

Applications: Agro-food, Biopharma, Fine chemical industry

► Materials

- Stainless steel 316L and various other materials

► Sealing system

- Single cartridge mechanical seal
- The mechanical seal surface can be equipped with a special powder discharge channel to ensure that external media do not contaminate the interior of the mixing vessel.

► Technical features

- The high-standard stainless steel pedestal incorporates a single cartridge mechanical seal.
- The mounting base of the stainless steel pedestal is equipped with a drainage channel designed to remove wear particles generated by the mechanical seal.
